

Cutting down of forest in the Tomsk area

By: Abdullaeva Famila

and

Alekseeva Yana

There are a lot of ecological criminals in Tomsk area. Including criminals who earn use cutting down forests and trees. Everybody know there are a lot of forests in Tomsk area. These forests are looked after nobody, so nobody can catch criminals. Of course, criminals must pay near 5000 rubles for one tree officially. But it's only official version, because usually criminals cut down forests and be unpunished.

The Tomsk area's a leader in illegal cutting down trees. How many people cut down forest every year? Perhaps, millions. And only 41 criminals were arrested.

Solutions

Why should we keep our forests and protect it from criminals? Trees keep our air clean, so we're living owing to trees and oxygen which is produced by trees. Some animals eat trees, so animals'd be die with out trees.

To keep forests - is everybody's duty. Every, every person can do something for forests, against criminals. Even you. We can create a website, because the public must know about this problem. Moreover we can organize a meeting, and criminals'll be scared. Except for that factories can process our old writing books, because a lot of forests die because of greedy factories. This factory wants to get more and more paper, so we can help forests this way.

The conclusion

So, now we tacking with you. Yes, just with you. You can help. Think about it and never give up. Because... Who know? Maybe your old books can save the world. Maybe you can save the world.

Thank you for attention!

DEFORESTATION IN CHINA THREATENS GIANT PANDAS.
