

Earth is our bigger home

Made by Bents Andrew, 9V

I want to tell you about the problem of dropping litter. The problem is that people drop their litter or garbage on a ground or on a floor, but not into the bins. They don't see the garbage bin around them and just throw it on a ground.

While you're walking along the street, you can see a lot of litter or garbage on a ground. It can be some sheets of paper, wrappers or even pieces of food. Also you can see litter near the bin, but not inside it.

Until people who drop litter realize their responsibility, they won't stop to drop litter. And we can only help them to realize that. We should create a website to let everybody know that dropping litter affects our environment. Also we should provide more garbage bins. It will make less garbage on a ground. Also we can fine those who drop litter.

*Do not pollute our planet!
Keep it clean!!!*
