

# «Car fumes»

This gases can destroy a life on  
the earth...

Made by Danilishin Sergey 9v

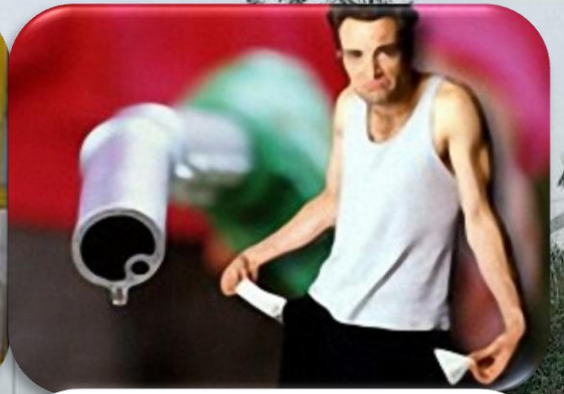

I wish to tell about a problem of car fumes. This gases negatively influence atmosphere. They help a birth of acts of nature including: flooding and droughts.

The quantity of cars working on gasoline and a diesel engine grows and through some tens years it will be already very difficult to live and breathe in towns. Knowing it, it is necessary to take certain measures.

I suggest to make more parks, places for walks, radically to convert auto concerns on manufacture hybrid and electro cars. Still it is possible to create alternative fuel with smaller emissions.

Old cars will be utilized, in owners, with small surcharge, will give out as much as possible similar car. Having made though one of these points - I is assured that nothing will threaten health of the Earth and mankind.

A man wearing glasses and a light blue shirt is reclining in a dark blue armchair with a patterned base. He has his hands clasped and is looking upwards. The scene is dimly lit, with a large, glowing glass filled with light bulbs on the left and many individual glowing light bulbs scattered on the floor in front of the chair. The text "Thanks for attention!" is overlaid in the center in a blue, 3D-style font.

**Thanks for attention!**
