# Our environment

By Saharova Elena

I'm going to tell you about  
environmental problems on my  
street where I live.

# Attention! A problem!

I'm worried about the state of Komsomolskij Prospect. My mother says that it was quite clean and beautiful in her childhood. My entrance looks more like a muddy puddle. The amounts of litter astonish me every day.

In my street, where I live,  
our environment is put at  
risk. It is sad to see my  
street littered with  
cigarette packages,  
wrappers and bottles of all  
kinds. Also city factories let  
out greenhouse gases...

I think people should create special funds for cleaning streets. Also they should learn to recycle waste.

Until we learn to recycle or reuse waste more effectively, we will continue to have environmental problems!

I understand my personal responsibility and **I have stopped dropping litter!** I think I can create a small website about our environmental problems to let everybody know.

thanks for  
attention
